20_04_3_4

Santa Maria Color

The Gemewizard™ Color Reference image displayed above is found by GWLAB to most closely resemble the actual color of the gem. Please note that printed colors may look slightly different from the actual gem.

MEASUREMENTS

ABOUT AQUAMARINE

Aquamarine is a variety of beryl, a group of crystallized beryllium aluminum silicates, occurring in shades of light blue. It is the birthstone for the month of March and the gemstone for the sixteenth and the nineteenth wedding anniversary.

DIGITALLY SIGNED

IMPORTANT LIMITATIONS This report contains only the characteristics of the specifc item/s described herein following its/their analysis and grading according to the GWLAB™ laboratory's highest standards. The report represents the best professional opinion of the item/s described, as recorded during testing and grading, limited to the methods and equipment available by the GWLAB™ laboratory at the time of the examination. In any event, GWLAB™ and/or its workers are not responsible for any loss, profit loss, damage or expense incurred by the customer or his customers hereafter due to any error found in this report or to any differences in test results which may transpire in case of repeated testing and/or use of other standards, norms, methods or criteria other than those chosen by GWLAB™ .
